SUMMARY

I am a Front End Developer, thriving in high-impact spaces and delivering results-driven, user-focused web solutions, with around 2.5 years of experience creating responsive and scalable interfaces across various industries. Passionate about building meaningful digital experiences through collaboration and adaptability, I focus on developing clean, efficient, and intuitive front end solutions that drive business results while building authentic relationships along the way.

EXPERIENCE

Lead Front End Developer

Jinarth Infotech **Jan 2025 - Present, Anand, Gujarat**

- End-to-End Front End Development: Leading 5+ projects across Engineering, SaaS, Pharma-tech, and Import-Export. Drive development from concept to implementation, improving performance and user experience by 15-20%.
- Collaborative Execution: Work closely with cross-functional teams to deliver features on time, aligned with client and business goals.
- Efficiency Optimization: Streamlined front end workflows and optimized code practices, improving overall development efficiency by 25%.

Jr. Front End Developer

Virtuant Infotech Pvt Ltd. **Jan 2024 - Dec 2024, Anand, Gujarat**

- **Development Process Management:** Led impactful front end solutions for a SaaS-based company, mentoring interns in a fast-paced development environment. Handled development for visa consultant websites, Marathon platforms, dashboards, and responsive mobile interfaces, improving efficiency by 20%.
- **User-Centric Implementation:** Implemented user-focused features based on requirements and feedback, improving landing page engagement and retention by 25%.
- **Process Optimization:** Streamlined development workflows, enhancing team productivity and ensuring timely, high-quality feature delivery.

Web Developer Intern

Virtuant Infotech Pvt Ltd. **June 2023 - Dec 2023, Anand, Gujarat**

- **Product Development & Implementation:** Gained hands-on experience in front end development within a production environment. Assisted in building and refining UI components and features, focusing on performance, usability, and user requirements.
- **Cross-Functional Collaboration:** Worked closely with designers, backend developers, and QA teams to ensure features met technical standards and production requirements.
